401 Church Street  
Nashville, TN 37243-1534

Subject: Documentation of Inter-Basin Transfer  
Huntsville Utility District  
Scott County

Gentlemen:

In accordance with the law, Chapter Number 854 of Public Acts 2000, we herby offer the following documentation for your review.

Originating Watershed: The Upper Cumberland River Basin

Receiving Watershed: The Upper Tennessee River Basin

Amount of Transfer: 43,732 Gallons Per Day

This transfer occurs when we provide water on a wholesale basis to Sunbright Utility District. Our highest continuous 90-day period (as recorded at the Master Meter) between September 2010 and August 2011 occurred during the months of May 2011, June 2011, and July 2011. The Master Meter readings for those three months were: 2,776,300 gallons, 2,333,400 gallons, and 2,762,200 gallons, for a total of 7,871,900 gallons for 90 days or 87,465 gallons per day. The Sunbright Utility District has informed us that approximately 50% of their distribution system lies north of the Tennessee River divide. Thus approximately one-half of the daily flow (43,732 gallons) is assumed to be transferred.

Sincerely,

Kares Hamby, Chief Operator  
Huntsville Utility District
